PROFESSIONAL SUMMARY

Results-driven Oracle DBA Manager with extensive experience in automation, patching, and performance optimization. Proven record of reducing downtime, streamlining deployments, and leading cross-functional teams in enterprise environments. Skilled in Oracle 19c, WebLogic 12c, and automation scripting. Strong business acumen with a background in finance, ensuring IT solutions align with business goals and drive financial efficiency.

PROFESSIONAL EXPERIENCE

CMiC

DBA Manager

Mar 2025 – Present
Toronto, ON, CA

- Lead the evening DBA team, providing leadership and direction across support operations.
- Manage high-priority escalations during weekends and off-business hours.
- Drive full-scale automation initiatives for the DBA team, leading to significant time savings and operational improvements:
 - Reduced installation time by 78%, cutting down the previous duration of 3 hours per resource per environment.
- Minimized client downtime for Oracle Security Patches from a full weekend to just 2 hours.
- Oversee the automation architecture for internal DBA tools, tracking effectiveness via logs and metrics.
- Coordinate deployments and upgrades with stakeholders and project teams
- Conduct monthly client calls to address issues, propose improvements, and identify upselling opportunities.
- Mentor and coach junior DBAs to align team knowledge and performance with organizational standards.

CMiC

Assistant DBA Team Lead

Sep 2024 – Mar 2025
Toronto, ON, CA

- Assisted in managing the DBA team's day-to-day responsibilities and technical escalations.
- Acted as the primary backup for the DBA Manager in operational and leadership functions.
- Supported process standardization and continuous improvement efforts across the team.
- Mentored junior DBAs and contributed to the creation of team documentation and internal training material.
- Collaborated with development and product teams to align database enhancements with release schedules.
- Helped gather and analyze KPIs to assess team performance and suggest improvements.
- Laid groundwork for automation frameworks, leading to broader rollout as DBA Manager.

CMiC

Database Analyst

Feb 2022 – Sep 2024
Toronto, ON, CA

- Deployed, developed, and maintained enterprise databases.
- Improved database standards to ensure SLAs were met.
- Researched technical problems, analyzed requirements, and designed processes to meet business needs.
- Estimate and document required work effort to develop, test and implement new technical processes/changes.
- Create technical documentation of implementation activities for management and other team members.
- Test and debug program units in conjunction with other units and/or systems and integrate with other program modules.
- Provides technical support and mentoring to other team members to foster professional development.

CMiC

DBA Coordinator

July 2021 – Jan 2022
Toronto, ON, CA

- Prioritized high-impact tickets and ensured deadlines were consistently met.
- Assigning and dispatching e-mails/tickets to individual database administrators.
- Monitored ongoing incidents and ensured timely status updates.
- Communicate with clients, especially on the patching plans and RCA for any incidents.
- Estimate and document required work effort to develop, test and implement new technical processes/changes.
- Analyze and process a high volume of tickets and emails.
- Participates in project and team meetings - interacting and collaborating with team members and other departments as appropriate.
- Developed an automation script that eliminated manual post-maintenance system checks

CRISIL – An S&P Global Company

July 2018 - June 2019

Retainer

Mumbai, MH, IN

- Worked on financial data collection, data gathering to provide counterparty information using financial statements, financial periodicals, reports and all debt issuance rated by S&P on the database.
- Analyze and carefully examine financial and investment information collected from S&P which includes profiles of companies, bonds, trades, and other investment data.
- Use a given set of tools and systems to analyze financial portfolio collected from S&P database.
- Extract required financial data set from input/source document related to assigned tasks into required output template applications and send it to S&P.
- Presented Monthly dashboard to onshore clients to understand capacity utilization.
- Project → i) Spearheaded a project to automate the sourcing and research of Rating Issuance files using Selenium in Python, resulting in a savings of 400 annual hours per resource
ii) Created a script on Python to read data from Excel/PDF and used the data for business needs.
